

## **Over and Over Again**

**A love song by Peter Brunette**

1. How many pipes make a full highland band?  
How many grains make a beach full of sand?  
How many times may we stroll hand in hand?

Over and over again.

How many figs can you fit in a cart?  
How many stars can you show on a chart?  
How many times can you capture my heart?

Over and over again.

CHORUS: Over and over, over and over again.  
Over and over, over and over again.

2. How many blooms may appear in the spring?  
How many songs can a mockingbird sing?  
How many times shall our wedding bells ring?

Over and over again.

How many dreams is a lifetime made of,  
How many flights on the wings of a dove?  
How many times have you won all my love?

Over and over again.

CHORUS (twice)
